PROJECTS

1. Portfolio-Website

A clean and responsive personal portfolio built with HTML, CSS, and JavaScript, showcasing my skills, projects, and experience with a modern UI and smooth interactions. It's designed to help recruiters quickly understand my work and connect with me easily.

<https://github.com/junaaid007-k/Portfolio-website.git>

2. Github-profile-finder

GitHub Profile Finder is a simple web app that lets users search any GitHub username and instantly view their profile details and latest repositories. Built with HTML, CSS, and JavaScript, it features smooth animations and a clean, responsive UI.
